## Compact Fluorescent

The advantage of the Exo Terra Compact Fluorescent bulb is its size and the fact that it is self-ballasted. A regular screw fitting is sufficient to operate these bulbs. The spiral shape of the bulb enables vertical or horizontal mounting without compromising performance.

## **Tropical Terrarium Bulb**

- Ideal for all tropical and sub-tropical reptiles
- Effective up to 40 cm (15")
- Provides necessary UVB rays for optimal calcium metabolism
- UVA rays stimulate appetite, activity and reproductive behavior
- Combine with Natural Light or Reptile Vision for optimal visual light output
- Optimal levels of UVB

The Exo Terra Reptile UVB100 emits optimal levels of UVB, similar to that of shady environments such as rain forests or other tropical locations. Reptiles living in these habitats receive moderate UV radiation due to the climatological conditions (fairly high humidity, changes in weather, etc) that prevent unfiltered sunlight from

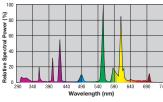

reaching the reptile's basking site. The optimal Vitamin D3 yield index ensures vitamin D3 photosynthesis to aid calcium absorption and prevent metabolic diseases.

Light and UV radiation in compact fluorescent bulbs decreases over time. Changing your terrarium bulbs yearly ensures optimal light conditions to keep your reptiles healthy.

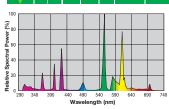

Visit www.exo-terra.com and register for the "Restore The Rays" program.
